State of Alaska FY2011 Governor's Operating Budget

Department of Administration Alaska Land Mobile Radio Component Budget Summary

Component: Alaska Land Mobile Radio

Contribution to Department's Mission

Assure that emergency wireless telecommunication services are reliable and available.

Core Services

 Provide emergency radio services for law enforcement, emergency personnel and first responders along Alaska's road system for the State of Alaska, Department of Defense (DoD), Non-DoD Federal Agencies, and municipalities.

Results at a Glance

(Additional performance information is available on the web at http://omb.alaska.gov/results.)

END RESULT A: Emergency radio services are operational and reliable.

• In FY2009 Alaska Land Mobile Radio systems were usable and available over 99.9% of the time, with no unscheduled outages. This meets the target of over 99% up-time with no unscheduled outages.

Status of Strategies to Achieve End Result

 In FY2009 Alaska Land Mobile Radio (ALMR) managers received and reviewed 100% of management metrics for ALMR sites. This met the target of 100% review of these reports.

Key Component Challenges

After several years of system design investigations, the ALMR System construction was initiated in 2003 under a Consortium Project Governance model that includes the State of Alaska, the Department of Defense, Non-DoD Federal agencies in Alaska, and municipalities. 79 of 90 sites were constructed and fully operational by FY2009 and the ALMR Project was formally transferred to full its on-going maintenance and operations phase. Two remaining sites were delayed due to site permitting issues. The ALMR system handled over 8 million calls by 14,000 individual radio subscribers during FY2009 with a system uptime of 99.75%

The ALMR System is governed and financed under a Consortium Agreement between the State of Alaska, the Department of Defense, and Non-DoD Federal agencies in Alaska. Annual operational and maintenance costs are allocated across consortium members and system users based on a Cost Share Agreement by all consortium members. Annual operating expenses are dependent on all consortium members securing their share of project costs from their authorizing budget authorities. A critical on-going challenge for the ALMR Project is securing the necessary annual operating funds across all consortium members.

Significant Changes in Results to be Delivered in FY2011

All 81 funded ALMR sites will be fully operational in FY2010. During FY2011 the ALMR System will maintain operations at 99% reliability. During FY2011 the separate Municipality of Anchorage 700 MHz emergency wireless system will be fully operational and full interoperability maintained with the ALMR System.

Major Component Accomplishments in 2009

- 1. ALMR Executive Council approved a Cost Share Agreement.
- 2. ALMR sites at Honolulu, Skagway, and Fire Station 12 (Anchorage) completed.
- Deconfliction of radio frequencies between SOA and ALMR systems partially resolved with the balance to be resolved in FY2010.
- 4. Annual Periodic Maintenance Inspections executed at 82 sites.
- 5. Training on radio unit programming and radio use conducted for new agencies transitioning to the ALMR system.
- 6. The first annual ALMR User Council training conducted.
- 7. ALMR system maintained above 99% reliability.
- 8. Full transition from project build-out to full operational and maintenance status executed.
- 9. ALMR system maintained above 99% reliability.
